August 27, 1990

Mr. Candy Manzanares
Castle Valley Resources
P.O. Box 766
Wellington, Utah 84542

Dear Mr. Manzanares:

Re: Removal of Surface Facilities Test Plot, Wellington Preparation Plant, ACT/007/012, Folder #2, Carbon County, Utah

On August 15, 1990, I met with Mr. Stan Kitchen on site to review the 1990 sampling requirements for the existing vegetation test plots at the Wellington Preparation Plant site. In summary, quantitative vegetation sampling was to be accomplished on the Slurry test plots only. On the coarse refuse plot, species composition data only is required. Finally, on the surface facilities plot, identification of the grass species that had survived the drought period was required.

With regards to the surface facilities plot, the required survey and identification was completed during my visit. Therefore, by way of this letter, Castle Valley Resources now has the Divisions approval to remove the remainder of the test plot as previously agreed upon.

The Division appreciates your cooperation in resolving the revegetation problems at the site and looks forward to implementation of the revised test plots later on.

Sincerely,

Lynn Kunzler
Senior Reclamation Biologist
