RE: WELLINGTON COAL PREPARATION PLANT
As Built Drawings of Ponds and Impoundments

Dear Rick:

Attached please find two sets of four maps showing as built conditions for impoundments at the Wellington Coal Preparation Plant. The following drawings are included:

- | <u>Fig. No.</u> | <u>Title</u> |
|-----------------|--|
| 712 a. | Refuse Basin |
| 712 b. | Clearwater Pond |
| 712 c. | Pipeline Slurry Pond |
| 712 d. | Auxiliary Pond, Road Pond and Dryer Pond |

We believe that the above drawings provide as built maps of all impoundments at the Wellington facility except for the Plant Sediment Pond. The existing as built of the Plant Sediment Pond in the permit should be adequate and therefore we are not providing a new as built of the Plant Sediment Pond.

Please call if there are any questions.

Sincerely,

Gregory J. Poole
