DIVISION OF
OIL GAS & MINING

RE: Schedule for Mid-Term Review Responses
for CASTLE VALLEY RESOURCES (ACT/007/012)

Dear Daron:

The Division recently conducted a **Midterm Review** of the permit at the Wellington Preparation Plant, followed by a request to the operator for further response in several sections in the plan. Please note the attached schedule proposed by CASTLE VALLEY RESOURCES to respond to the items listed in the Division's review document.

As you know from several meetings with you and other members of your staff, new projects are being planned for the Wellington site. Most of these projects would require that the post-mining land use of the area be industrial. With these new developments, the permit and reclamation procedures would be changed considerably. Consequently, it would be much more productive and cost-effective for CVR to respond to certain issues requested by DOGM with methods consistent with their objectives (they do not want to submit engineering studies, then almost immediately have to revise the work). Issues that should remain unaffected by the new developments will be submitted in earlier dates on the schedule.

Please review the schedule and call if you have questions. Thank you for spending time with us in recent meetings and correspondence.

Sincerely,

Patrick D. Collins, Ph.D.
Environmental Consultant
