RE: WELLINGTON COAL PREPARATION PLANT
Request for extension for submission of Dryer Sediment Pond plans.

Dear Mr. Haddock:

As you discussed on the phone with Mr. Greg Poole (HA&L), we need to request an extension of the due date for submission of plans for expansion of the Dryer Pond (Watershed No. 4, includes office area). We need further time to solicit permission from the Denver and Rio Grande Western Railroad for the proposed expansion inside of their right-of-way. We request that the submission date be extended to June 1, 1992.

Please call either ourselves or Greg Poole (HA&L, phone 566-5599) if there are any questions on any of the above. Thank you for your consideration.

Sincerely,

Candido Manzanares
Plant Manager
