Salt Lake City, UT 84180-1203

RE: Permit #ACT 007-012
Submittal to incorporate a platform scale and ability to oil
stoker coal.

Dear Mr. Haddock:

Please find enclosed for your approval three (3) copies of 1:a revised Castle Valley Resources SPCC plan, 2: a revised Surface Facility map Plate E9-3341, and 3: a revised page 3 of chapter 5 section 5.28 of the Mine and Reclamation Plan.

The changes made to these documents reflect the addition of a new platform scale, the boundaries of the coal storage pad, and the addition of being able to use stoker oil to oil coal.

These changes are necessary 1: to account for coal coming into and leaving the facility by truck and 2: contractual obligations dictate future stoker coal to be oiled prior to delivery to the customer.

Since these changes constitute no more than \$1000 dollars of increased reclamation cost, the bond has not been revised. The contingency dollars will more than satisfy these costs.

Should you have any questions or need additional information, please contact me at 687-9813.

Sincerely,
GENWAL COAL COMPANY

Larry W. Johnson
Engineer

R. Jay Marshall
