PERMIT NUMBER: ACT/007/012 DATE OF INSPECTION: October 12, 1993

(Comments are Numbered to Correspond with Topics Listed Above)

1. Permit -

The beltline from the coal storage yard to the preparation plant was relocated during the weekend prior to inspection. The relocation of belt was without Division approval; therefore, NOV #93-39-8-1 was issued. The abatement was to submit a current mine facilities map and address the changes in the MRP. The operator abated the NOV within 2 days of the violation.

2. Signs and Markers -

The signs were located at the mine entrance where a public road is located. Signs may need to be changed if there is a separation of the permit area.

4b. Sediment Ponds -

All ponds were functioning as designed and there were no signs of erosion to inlets, outlets or slopes of ponds. Water was not discharging at the time of inspection.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.
