PERMIT NUMBER: ACT/007/012

DATE OF INSPECTION: August 26, 1994

(Comments are Numbered to Correspond with Topics Listed Above)

4a. Diversions -

The diversions throughout the property were spot-checked and no breaching or erosion could be seen. The property has received rain since the last inspection.

4b. Sediment Ponds and Impoundments -

Sediment ponds and impoundments were relatively dry, although, there was a rain storm which had taken place recently. There were no signs of erosion of embankment or inlets of the ponds.

4c. Other Sediment Control Measures -

The alternate sediment control areas were inspected and reviewed with the operator dealing with the new Division directive. The operator was notified that within 30 days from this inspection a submittal would be required if the ASCA areas are not complying to the directive at Wellington Prep Plant. It appears that additional designs maybe needed.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.
