MEMORANDUM

TO: Daron R. Haddock

FROM: Bill Howell *Bill*

DATE: September 26, 1997

SUBJECT: Request for permit change, Nevada Electric Investment Co.

I have discussed with you and with Carbon County the Postmining Land Use Change proposed by Nevada Electric Investment Company on the site of the Wellington Coal Preparation Plant.

Your primary concern was the continued availability of borrow material to be used at some future date when the slurry settling ponds are reclaimed. It is my understanding that proponents of this change of permit have identified sufficient borrow material that will remain available for such time as reclamation of the ponds is undertaken. This arrangement should satisfactorily address your concerns in this regard.

I understand also that a client has been identified who is prepared to proceed with an industrial development project on the amended permit area as soon as the permit change is approved. This being the case, and assuming that your concerns have been satisfactorily addressed, this Association is in full support of the request for permit change and urges its expedited approval.
