Re: Extension Request for Violation N97-41-4-1, Nevada Electric Investment Company, Wellington Preparation Plant, ACT/007/012, Folder #5, Carbon County, Utah

Dear Mr. Traweek:

The Division received the referenced extension request, and the abatement date for the violation is being extended to 90 days from when the violation was written, September 22, 1997. We recognize it may take longer than this to finalize plans for soil borrow areas, but you need to exhaust the initial 90-day time period before the date is further extended.

Please call if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "P B B".

Paul B. Baker
Reclamation Biologist
