Paul:

As you have requested, I have included the 3rd quarter water data that was missing in our inspection book when we did the December 1998 inspection.

The sampling was conducted at the appropriate time, some of the following data were in the book you observed, but the missing data were requested from JBR (they conducted the field sampling).

I have also inserted the missing data in our inspection book.

Please let me know if you have additional questions or comments.
