Subject: Wellington data 1st, 2nd and 3rd quarters 2000

Hi All,

Today I processed all Wellington water quality data in the pipeline for the first three quarters 2000.

I deleted the following samples from the pipeline because they have already been updated into APPX. These were uploaded twice.

CTE 59-21057
CTE 59-21058
CTE 59-21059
CTE 59-21060
CTE 59-21061
CTE 59-21062
CTE 59-21063
CTE 59-21064

Of the remaining samples I processed these.

GW-15A CTE 59-21150 3/29/2000 #: tot. Fe = MDL
GW-15B CTE 59-21151 3/29/2000
GW-16 CTE 59-21152 3/29/2000
GW-17 CTE 59-21153 3/29/2000

The asterisk to the left of the sample indicates that the sampler's name was left blank. I inserted Wellington into this space to remove the error and allow processing.

The pound sign to the right followed by a parameter and short description indicates that the sample had parameter warnings. These warnings require the value to be verified from the data sheets. Since I have no hard copies of this data I cannot verify numbers therefore I approved these values "as is". I put a

simple explanation of the error or warning after the # sign.

This removes all samples from the pipeline for Wellington.

Any questions contact me.
