Subject: NO6-37-1-1 Abatement Information for MRP, NEICO, Wellington Prep Plant, C/007/0012, Task ID #2818

Dear Mr. Collins:

The Division has reviewed your Abatement Information for MRP application. The Division has identified several deficiencies that must be addressed satisfactorily before the Division can find that the requirements of the R645 Coal Mining Rules have been met and approve the amendment. Those deficiencies are listed as an attachment to this letter.

Each deficiency identifies its author by that author's initials in brackets so that your staff can directly communicate with that individual relative to the preparation of your response to a particular deficiency.

Jim Smith                      [JDS]                      (801) 538-5262

Please respond to these deficiencies as soon as possible, but no later than December 10, 2007, so that we may efficiently complete this review.

Sincerely,

Pamela Grubaugh-Littig  
Permit Supervisor

**Deficiency List**  
Task ID #2818  
Wellington Prep Plant  
N06-37-1-1 Abatement Information

**R645-301-121.200**, The Permittee needs to remove the reference to Dwg. A9-1464 in the Dryer Pond discussion on page 5 in Section 5.30 of the submittal. In 2006, Dwg. A9-1464 was removed from the MRP and replaced by Dwg. 712e. [JDS]

**R645-301-121.200, -742.300**, The Permittee needs to resolve discrepancies between the current and new versions of Table 742, and between Table 742 and Dwg. T1-9597. In Table 742.0c in the current MRP, CVL-C2 is sourced by ditches CVL-D2 and D3, and CVL-C3 [with a printed 2 crossed-out and replaced with a handwritten 3] receives flow from CVL-D5; these are in accord with Dwg. T1-9597. In the proposed amendment, culvert CVL-C3 is not listed. Watershed CVL-7F is given as the contributing source to CVL-C2, but Dwg. T1-9597 shows CVL-7F is at the outlet end of culvert CVL-C3 and is not associated with CVL-C2. [JDS]

**R645-301-121.200**, The Permittee needs to clearly identify the correct location of the runoff and pond-sizing calculations referred to on pages 6, 7, and 9 in Section 5.30 of the submittal: there are no such calculations in Appendix B. There are runoff and pond-sizing calculations in the Hydrology Appendix in Volume II, but it is not clear if this appendix contains the referenced calculations and, if it does, it is not clear where in this large appendix the respective calculations are located. [JDS]

**R645-301-121.200**, The Explanation on Dwg. E9-3341 lists “YY. COVOL MODULAR COAL FINES WASH PLANT” and “H. RIVER PUMPHOUSE” under the heading “FACILITIES REMOVED DURING RECLAMATION - NO LONGER SHOWN ON MAP”, but both facilities are still shown on the map. The Permittee needs to rectify this discrepancy. [JDS]
