2. Signs and Markers

The permit boundary is shown on Plate E9-3341. We walked the west boundary. The boundary is fenced and signed, photos are saved to the database.

3. Topsoil

No impacts to the borrow area soils were seen. The attached panorama of the site shows borrow areas designated on Plate G9-3511.

4.c Hydrologic Balance: Other Sediment Control Measures

The gravel operation comes within 5 feet of the permit boundary. In most cases a berm separates the gravel operation from the permit area. In two or three locations, the berm has breached and sediment flows down erosion channels into the permit area, clogging the Permittee's ditches (see attached photos). Hopefully the Permittee can work with the gravel operator (Nielson Construction) to correct the situation.
