Hi Erik and Patrick:

I wanted to remind you both that there are some Wellington data from the 4th quarter in the pipeline that need QA/QC. Make sure you get the data in before the March 31, 2012 end-of-quarter deadline to avoid an NOV.

Also, you probably got the letter that we have initiated the midterm review for Wellington. This gives me a good opportunity for me to review the plan (in particular the PHC) and identify areas that need revisions. I know we have been talking about doing the updated PHC for a while now, but I would suggest rolling it into the midterm review rather than dealing with it as a separate amendment.

I will also be in touch about a site visit for any staff on the review team that are interested. The midterm is due June 10th. For scheduling purposes, are there any dates between now and then that you know of that will not be good for either of you?

Patrick I left you a message to call me but figured I would sum up the nature of my call in this email. Give me a call to discuss at your earliest convenience. Thanks....

April

April A. Abate

Environmental Scientist III

Division of Oil, Gas and Mining

1594 W. North Temple, Suite 1210

Salt Lake City, Utah 84114-5801
