RE: Wellington Prep Plant(C/007/0012): Test Burn Planned

Dear Mr. Haddock:

As you know, Price River Terminal (PRT) is actively conducting onsite reclamation activities at the Wellington Prep Plant property. To continue these activities, they are planning reclamation of the Slurry Ponds located on the east side of the property.

Following laboratory analyses on the fines in these ponds, PRT is now planning to have 1,000 T of this material retrieved for an off-site test burn. PRT has been working closely with MSHA and has procured a *Ground Protection Plan* as well as *Safety Training Plans* [30 CFR, Parts 48(B) and 77.107] in order to conduct activities on the MSHA impoundments and refuse piles at Wellington.

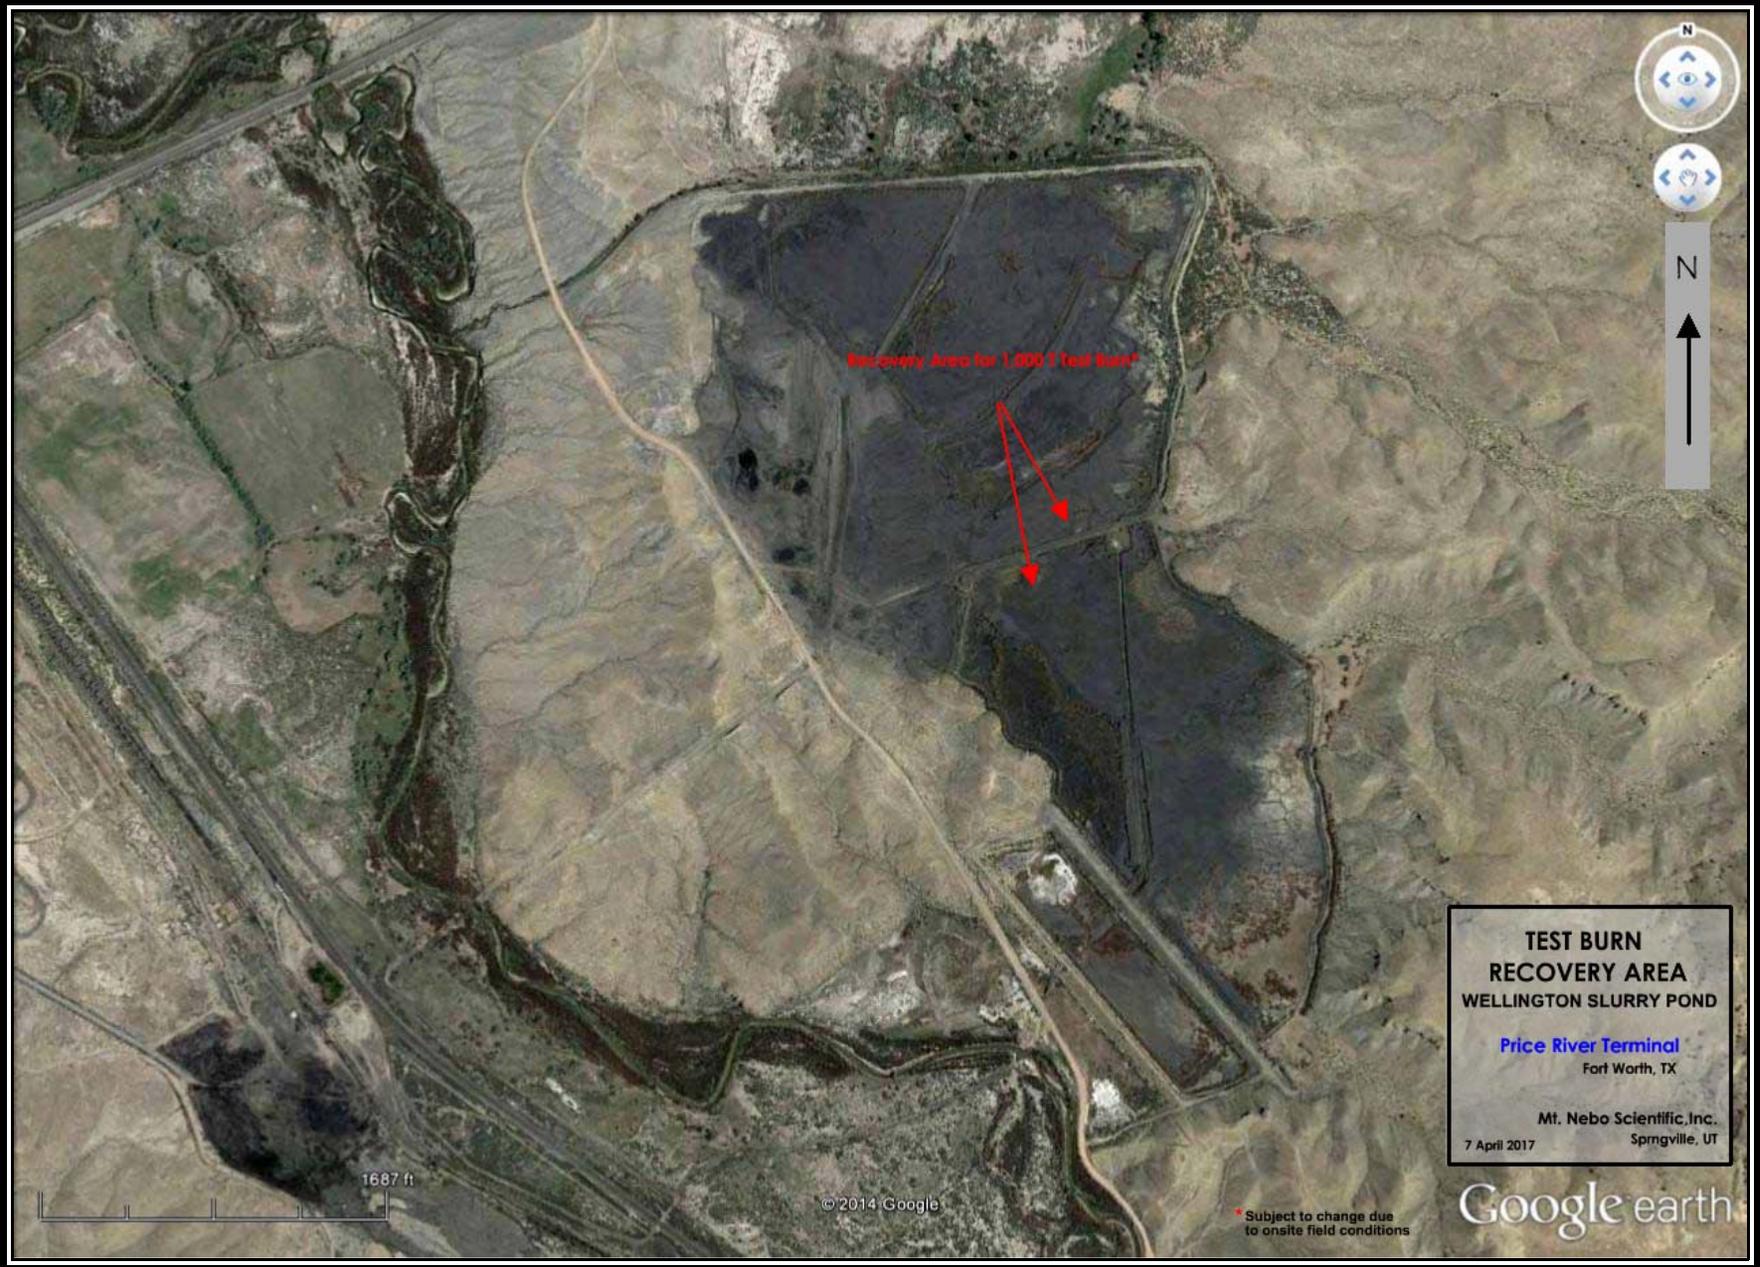

These operations should begin this month sometime. Attached is a map showing the recovery area.

Please let me know if you have questions or comments.

Sincerely,

Patrick D. Collins, Ph.D.
Resident Agent

cc: Russell Dial (PRT)

Recovery Area for 1,000 T Test Burn*
