Hi Steve,

As we discussed earlier today, I have re-entered the previously entered 3rd quarter 2014 water monitoring data for PRT/Wellington Prep Plant into the database by merging the information from the September 2014 operational and supplemental baseline lab samples. It took some considerable effort, but I think everything should now be present in the database and ready for uploading. Let me know if everything works out alright on your end.

Thanks for your help Steve, and have a fantastic new year!
Erik
