Dear Ms Grubaugh-Littig

*QAIA*

Please find enclosed the C1 and C2 forms reflecting desired changes to the Phase II bond release submittal. As per our discussions please find enclosed three copies of an updated map (DWG II-4C) showing culvert #2 being left in place after final reclamation. The culvert is located between sedimentation ponds #1 and #2.

Initial plans was for the culvert to be left in place after final reclamation. However, in subsequent approved submittals the culvert was shown to be partially removed. The re-disturbance impacts associated with removing the culvert would be more significant than the potential impacts that might be encountered by leaving the culvert in place.

If you have any questions or need additional information please let me know.

Sincerely,

*R. Jay Marshall*
