Subject: Repairs Ditch 3A and Berm Channel 31

Jay,

With the recent heavy snow fall we received it probably would be better to hold off on the repair work for Ditch 3A and Channel 31 until the weather is conducive to initiate and complete the work with out undue environmental damage to the surrounding areas. I have spoken with Pam and she agrees. I will keep contact with you and we can determine the best time to start construction.

Thanks,
Karl
