I just created this company. I am adding the shareholders to it. There are Class A and Class B shares. Class A = 100% and Class B = 100%. As you know our system will only reflect Shareholder with no difference between Class A and B shares. As they presented the information to me this company will reflect 200% shareholders. Is this what they want to show? If not please show exactly what they would like reflected in AVS.

I have another question about the shareholders. They are showing Robert E Murray, Robert Eugene Murray and Robert Edward Murray. Is Robert E Murray either one of these other two or are they three different people?
