Subject: Re: Fwd: Horse Canyon Mine Status

Internal
c/007/0013

Sedimentation Pond 1 was reclaimed several years ago and was part of the original Phase III bond release. The remaining sedimentation pond (#2) at Horse Canyon Mine collects runoff from the buildings area. That area and the pond area were donated to the College of Eastern Utah/University of Utah. To meet phase three, UtahAmerican removed the spillway and decant pipe. UtahAmerican has met their reclamation requirements with respect to the pond. DWQ can inactivate the UPDES permit for Horse Canyon part of the mine.
