Subject: Lila Canyon

Jay just informed me that Tom Suchosky and he will be installing the crest stage gage and siphon sampler @ the first accessible location (the SW 1/4 of Section 15, T16S, R14E) which is just due west of the construction site, tomorrow, March 11.

This will be the first of the seven monitoring locations required under requirement 1(b), in Exhibit "A" to Stipulation for Dismissal Agreement, (additional condition attached to the permit) dated October 15, 2007.

I will be going to the site on Friday, March 14.

Thank you.
