I made the changes, added alkalinity to all of the sites and set up carbonate and bicarbonate for CaCO₃. I kept acidity in just in case you are still running those samples. If not don't worry about it. Alkalinity is more important for that area.

>>> "Marshall, Jay" <jmarshall@coalsource.com> 1/17/2008 1:10 PM >>>

Dave we still need the Alkalinity, Bicarbonate to be as CaCO₃ and not HcO₃. The data base wants HcO₃ and the lab is reporting CaCO₃ for Bicarbonate

Thanks
