Re: UtahAmerican Energy, Inc. Horse Canyon Mine, Response to deficiencies 10-010 Minor Revision (Ventilation Breakouts) Horse Canyon Part B Lila Canyon ACT/009-013

Dear Mr. Haddock,

Attached you will find three (3) copies of submittal 10-010. This submittal addresses deficiencies identified in submittal 10-009.

Reclamation will be simplified by moving the fan down to the portal pad and installing it on portal #0. Since all breakouts will be done from underground surface disturbance will be kept to a very minimum.

Since the breakouts are to be bonded an associated disturbed area had to be identified even though there will be very limited if any surface disturbance associated with the breakouts. There will be no changes in disturbed area, or permit area acreages.

All appropriate maps have been revised showing the location of all the new ASCA areas with the area of disturbance noted. Seeding of the ASCA areas is addressed in Appendix 7-4 page 59. No soils will be recovered at the limited area of the ventilation breakouts.

The bond calculations have been revised adding the ventilation breakouts. Since the changes in the bond calculation amounts to less than 1% no additional bond is required.

Upon final reclamation the breakouts will be sealed according to the approved plan for portal seals found in Appendix 5-6.

C1 And C2 forms are included as well as redline and strike out copies where applicable. A separate C2B form is included for the confidential archaeological information to be inserted in the confidential binder.

Your immediate attention is requested since we are scheduled to breakout in early December.

Should you have any questions please call.

Sincerely,

R. Jay Marshall
