Hello Jay,

I spoke with Bruce Webb at the BYU laboratory today, regarding the calculations provided for the samples of rock slope material analyzed in July and October 2009. Mr. Webb is going to revise the reports to use the appropriate units. There will be no change to the results (except the units). Please provide the revised reports with your next submittal to the Division, in response to Task 3498 deficiency R645-301-233.340.

Thank you.

Priscilla.
