Subject: Codes for Lila Monitoring Sites & Reporting for UPDES Outfalls
CC: Jim Smith; OGMCOAL

Hi Dana,
Below please find the database codes that you requested for the Horse Canyon water monitoring points.

The System ID (Mine ID No.) for the Horse Canyon Mine is 9

Sample site numbers are as follow:

Springs
L-6-G	023
L-7-G	024
L-8-G	025
L-9-G	029
L-10-G	030
L-11-G	031
L-12-G	032
L-16-G	124
L-17-G	125

For Quaker Spring, from the maps I reviewed it looks like this site was identified during the baseline spring and seep inventory as Site 3C. Sites 3, 3A and 3B are also in the same area. I am therefore providing you with the site numbers for all 4 of these sites and you and Jay can determine which is most appropriate.

3C	040
3	037
3A	038
3B	039

Wells
IPA-1	026
IPA-2	027
IPA-3	028

Streams
B-1	003
L-1-S	018
L-2-S	019
L-3-S	020
L-13-S	122
L-14-S	123
L-15-S	126
L-18-S	127
L-19-S	136

UPDES Outfalls
L-4-S	021
L-5-G	022

I also wanted to remind you that as UPDES monitoring is required monthly, data for the 2 UPDES monitoring points should be uploaded for every month. The data I've reviewed to date have only included observations for only one month per quarter.

Please let me know if you have any questions or difficulties uploading the data.

Thanks,
Kevin
