12/9/2010 email from Kevin Lundmark to Jay Marshall re: Topsoil Pile

>>> Kevin Lundmark 12/9/2010 11:03 AM >>>

Jay:

This is a reminder that you still need to provide the Division with UEI's schedule for finishing the consolidation of end-dumped soil onto the soil stockpile and completion of the berm / silt fence around the pile.

Thanks,  
Kevin

>>> Kevin Lundmark 12/2/2010 12:10 PM >>>

Jay:

Attached please find a copy of the inspection report for 11/30/2010 at Lila Canyon. There are a couple items you need to follow up on:

- 1) By the end of next week, please provide the Division with UEI's schedule for finishing the consolidation of end-dumped soil onto the soil stockpile and completion of the berm / silt fence around the pile.
- 2) Please provide the final elevation of the mine floor at the intersection of the rock slope and the coal seam

I will notify Dana M (copying you) once the Water Database has been modified to allow input of data for Quaker Spring. I should be able to get this done later today.

Thanks and let me know if you have any questions.

Kevin
