4.b Hydrologic Balance: Sediment Ponds and Impoundments

Both Ponds 1 and 2 were inspected and evaluated. Ponds were dry. Water sediment markers were visible. Inlets and outlets appeared to be in order for proper function. No stability issues were identified.

7. Coal Mine Waste, Refuse Piles, Impoundments

This inspection was used to verify that uncontrolled coal fines (from NOV #10097) had been properly cleaned. Maps were reviewed and clarification was made by Jay Marshall that during Phase II of construction that the area described in NOV #10097 would become disturbed area. Based on this information, the Division does not expect the uncontrolled coal fines to be an issue during future inspections.
