Hi Jay,

Sorry, we are a little slow getting back to you on this. We haven't been quite sure how to deal with a bond release application coming in the winter. According to R645-301-880.110 we should only accept applications for bond release during seasons where we can properly evaluate the completed reclamation work. I have gone ahead and reviewed your public notice and it looks good to me. You should go ahead and publish your notice at this time. You should probably go ahead and send out your letters as well. Copies of the published notice and copies of the sent letters are to be made part of your application, so technically we can't accept your application until they are submitted anyway. We will be sending your application back to you so that you can complete it and resubmit it with the required copies and when the timing is more appropriate. Thanks.

Daron:

A Phase III bond release was submitted on February 8<sup>th</sup> 2012 for ditch #31. Was the public notice adequate? We are anxious to get the publication going.

Jay
