4.a Hydrologic Balance: Diversions

All diversions, ditches, and culverts are properly designed with certified drawings. Ditches, culverts and other sediment control measures were functioning properly and were recently maintained as part of the operator's "spring cleaning". Surface drainage maps are accurate and have been field-truth verified. A maintenance checklist is used and was provided to demonstrate diligence in environmental compliance.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Impoundments have been properly inspected. No hazards were identified. A minor failure which had occurred on the inslope of Sediment Pond #2 was repaired and corrected. All inlets and outlets were functional. The elevations at pond 1 and 2 are 5833.6 and 5834, respectively.

8. Noncoal Waste

No non-coal waste issues were identified during the inspection.
