IPA-3	Little Park	Borehole	Quarterly	Water Level Only

NOTE: L-13-S, L-14-S, L-15-S and L-18-S were monitored monthly during the permitting process to determine flow characteristics of the various washes. The monitoring locations are no longer needed since the flow characteristics have been well documented. The monitoring locations are where the road crosses dry washes. Samples have never been taken and flow has never been observed.

NOTE: L-15-S and L-18-S have previously been permanently suspended. L-13-S and L-14-S should also have been suspended at that time. Including them in this Submittal is just cleaning up the permit.

NOTE: Site L-20-G has been permanently suspended following completion of baseline monitoring for the initial mine permit. The monitoring site is outside the permit area and is also outside the influence of subsidence. No further monitoring is needed.

Other sites temporarily suspended until two year prior to second mining influence.

Due to access concerns only the 2nd, 3rd and 4th quarters will be sampled. First quarter has been no access.
