2. Signs and Markers

Mine identification sign is placed at the entrance into the mining permit area and contains all of the required information.

4.a Hydrologic Balance: Diversions

The road diversions were inspected during the partial inspection. Wood blocks, timber pieces, boxes boards and tumble weeds were observed in numerous locations. The locations were identified by Karin Madsen to give to surface personnel so that they can be addressed as needed maintenance.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

A piece of corrugated sheet metal is within the interior of pond #2. The metal was probably blown there. The metal should be removed from the ponds interior.
