Re: Lila Canyon Mine, UtahAmerican Energy, Inc. (UEI) C/007/013
Midterm Permit Review Task ID #5739

Dear Mr. Haddock,

In regards to the Completion of Midterm Review, Task #5739 at Lila Canyon Mine, it has come to our attention that the reclamation plan deficiency details and calculations requested are going to require more time than allotted to satisfactorily complete. In addition, to avoid halting production and surface activities to construct an berm on the south side of the coal pile, immediately after the inspection with the Division, UtahAmerican Energy (UEI) quickly constructed a temporary berm keep further fines from draining off of the coal pile, however in order to construct an appropriately sized berm and coal fine protection, UEI will need to wait until our longwall move (mid-December) to do appropriate construction.

Therefore, UEI respectfully requests a deadline extension to complete the tasks required and submit all of the midterm deficiencies together as one submittal.

If you have any questions, or need any additional information regarding this request, please contact me directly at 435-888-4000.

Sincerely,
