Hi Karin,

Yes that's fine, we just want to make sure are ahead of the game timing-wise so we can be sure to get a take permit before you'd need it. But as far as the method goes, it doesn't matter to me whether it is from the ground or the air as long as it is done by a qualified biologist.

Thanks for the heads up!

Good Morning Todd!

Quick question for you: The past 2 years Joe allowed us to have our raptor consultants conduct the raptor surveys from the ground, oppose to by helicopter. Is this method acceptable to you? Just wanted to make sure before I scheduled them out for the year.

Thanks,

Karin Odendahl-Madsen
