Subject: **Renewal of UPDES Permit No. UT0026018
Lila Canyon Mine Facility (Sanitary System)**

Dear Ms. Madsen:

The above-referenced Utah Pollutant Discharge Elimination System (UPDES) permit will expire next year at this time on **November 30, 2020**. The Division of Water Quality (DWQ) likes to provide facilities with ample time to complete and submit the required EPA forms well in advance of the expiration date to help facilitate an on-time permit renewal.

Pursuant to UAC R317-8-3.1(4), all UPDES permittees must apply for reissuance of the permit not less than 180 days prior to the expiration date of the existing permit. A copy of the EPA application forms may be found at <https://deq.utah.gov/water-quality/updes-permitting-program>.

All applicants for new or renewal permits must complete the EPA forms that are specifically applicable to their facilities. Those facilities filling out EPA Forms 2C, 2D and 2E, must also complete EPA Form 1. **Forms 1 and 2E** are the applicable forms for your facility, but please refer to the table below to confirm as appropriate.

EPA Application Form	Title/Applicability	Regulation Cite
1	General information	40 CFR 122.21(f)
2A	New and existing POTWs	40 CFR 122.21(j)
2C	Existing manufacturing, commercial, mining, and silviculture discharges.	40 CFR 122.21(g)
2D	New manufacturing, commercial, mining, and silviculture discharges.	40 CFR 122.21(k)
2E	Manufacturing, commercial, mining, and silviculture facilities that discharge only non-process wastewater. (for example: non-contact cooling water or treated sanitary wastewater)	40 CFR 122.21(h)
2S	Treatment Works Treating Domestic Sewage (TWTDS)	40 CFR 122.21(q)

Lila Canyon Mine Facility

You may also need to complete the "Utah Antidegradation Review Form for Applicants" found near the bottom of the following DWQ web page: <https://deq.utah.gov/water-quality/antidegradation-reviews-water-quality>.

Please complete and return all applicable forms to DWQ as soon as possible, but no later than **February 1, 2020**, so that we can begin to process your permit for an on-time renewal.

Thanks for your continued efforts to protect Utah's Water Quality. If you have any questions, please contact me at jstudenka@utah.gov or at 801-536-4395. I look forward to working with you as your permit facilitator.

Sincerely,

Jeff Studenka, Environmental Scientist
UPDES Surface Water Section
