1. Permits, Change, Transfer, Renewal, Sale

The Division is reviewing the "Permit Transfer" for the Horse Canyon/Lila Mine.

2. Signs and Markers

The identification sign was inspected and it meets the requirements of the R645 Coal Rules. See Photo

3. Topsoil

I inspected the topsoil piles and I did not see any signs of wind or water erosion. The topsoil piles appear to be stable and protected by a berm. See Photo

4.a Hydrologic Balance: Diversions

The diversions and culverts were open and functioning as design. Sediment has started to fill within these structures. The permittee had cleaned out several diversions since the last inspection and additional cleaning is needed. See Photos

4.b Hydrologic Balance: Sediment Ponds and Impoundments

I inspected the two sediment ponds at Lila Canyon. Both ponds were basically dry. There was a small in Pond #2. The water going into pond #2 is washdown water from cleaning equipment or beltlines. The ponds are incised and therefore are stable. No hazardous conditions were noticed. The 60% percent marker for sediment pond #1 will be resurveyed.

5. Explosives

Pictures of the explosive magazines were taken.

8. Noncoal Waste

The property was clear of non-coal waste materials such as oil, trash, and grease cans.

10. Slides and Other Damage

No slides or other damages were noticed during the inspection.

16.a Roads: Construction, Maintenance, Surfacing

The roads were compacted with no dust control problem. The roads were wet and had been recently water.

16.b Roads: Drainage Controls

These diversions were inspected. These diversions are a constant struggle to keep open from sediment and coal fines. These diversions need cleaning basically at the inlets to culverts.

Permit Number: C0070013
Inspection Type: PARTIAL
Inspection Date: Wednesday, June 2, 2021

18. Support Facilities, Utility Installations

No new facilities constructed since the last inspection.
