Dear Mr. Feight:

Enclosed for your information is one copy of American Electric Power Service Corporation's 1978 proposed drilling program. Copies have also been sent to the BLM and they have been asked to help arrange a schedule to conduct an onsite inspection.

We do not know exactly how responsibilities for surface drilling programs will be handled under the new Surface Mining Act, but we plan to proceed with the preparation of an EA and field work so that approval of the drilling program can be given as soon as possible.

If you are interested in participating in the onsite inspection, please let us know. Any questions or comments concerning this matter should be directed to William Hauser of this office.

Sincerely yours,

Jackson W. Moffitt
