RE: Herbicide Control
Gordon Creek #2 - ACT/007/016
C.V. Spur - ACT/007/022
Carbon County, Utah

Dear David:

This is to confirm the verbal agreement of September 2, 1981, for Beaver Creek Coal Company to proceed with its plans to use 2, 4-D LO-V ESTER to control Salsola sp. on the 1.5 acres at Gordon Creek #2 and the 2 acres at C.V. Spur. Spraying will be conducted as described in your letter (with attached maps indicating the areas to be treated) dated August 28, 1981, with the following recommendations as per our conversation:

1. On some portions of the area (to be marked in the field) the rate will be increased to 2 pounds/acre.
2. The results of both rates of application (% kill) will be submitted to the Division. Results should be evaluated between 3-4 weeks after the treatment.

If I can be of further assistance, feel free to contact me.

Sincerely,

LYNN M. KUNZLER
RECLAMATION BIOLOGIST
