Carbon and Emery Counties

Dear Mr. Guy:

The Division has received your letter dated September 29, 1983 regarding information submittal dates for the above-referenced mining operations. In order for the Division and OSM to be able to meet the objective of approval of all existing permit applications no later than March 1984, it is necessary to maintain the established review schedule. All information must be furnished to the Division according to that schedule so that a Determination of Completeness can be made to allow further review of the application and increase the probability that an approval can be issued by the designated deadline. A more explicit letter will be forthcoming to all operators explaining the importance of this position.

As always, the Division is willing to meet with Beaver Creek Coal Company to discuss and clarify any deficiencies noted in the draft Technical Analysis (TA) for each application.

Sincerely,

JAMES W. SMITH, JR.
COORDINATOR OF MINED
LAND DEVELOPMENT

JWS/btb
