Memo to Coal File:

RE: Beaver Creek Coal Company
Gordon Creek #2 Mine
Southwest Lease
ACT/007/016, #7
Carbon County, Utah

On June 20, 1984, Steve Cox and Everett Hooper from the Division visited the Gordon Creek #2 Southwest Lease site. The purpose of the visit was to inspect power poles to insure they were raptor-proof and to collect samples of the topsoil substitute piles. Six samples of the proposed substitute material were taken for analyses to Utah State University.

Methods of modifying the power poles to insure they are raptor-proof were discussed.
