March 2, 1984

Memo to Coal File:

Final Technical Analysis
and Findings Deadline
Beaver Creek Coal Company
Gordon Creek #2 Mine
ACT/007/016, #2
Carbon County, Utah

This memorandum is to serve as documentation that the March 2, 1984 Division deadline for the Final TA and Findings Document has been delayed for reasons which are attributable to the OSM. The OSM's review of the draft FTA was given by telephone (Lou Hamm, OSM, to M. Boucek, DOGM) on March 1, 1984, and an annotated review of the document was delivered to the Division March 2, 1984. The Division staff will have to delay sending the document out in order to incorporate the OSM review comments. The Division document had been prepared and was finalized on March 1, 1984.

An additional delay will result due to the unavailability of the CHIA, a document which must be prepared before the FTA and findings can be finalized. The CHIA is being prepared by OSM Contractor and is not yet complete or available to the Division. To date, the Division has not been informed as to when this document (CHIA) will be finalized. Therefore, the delay of the Gordon Creek #2 Findings and FTA will remain in abeyance until further notification from the OSM.
