Re: Abatement for NOV 86-4-2-1
Proposed Haul Road
Drainage Control ^{2 & 7}
Gordon Creek No. ~~2~~ Mine
ACT/007/016
Carbon County, Utah

Dear Mr. Braxton:

At the request of Dave Lof, I am submitting plans for more adequate drainage control along the No.2/7 Mine Haul Road. The existing plan shows the drainage only along the highwall side of the road - the proposed plans reflect the actual situation with the drainage along both sides of the haul road. The proposal also shows the drainage along the berm side of the road will be collected in a concrete catch basin and taken to the Bryner Canyon Channel via a 15" flexible culvert. This will prevent further erosion of the canyon side of the embankment.

Three copies of the proposal are provided with this submittal. The pages and plates are numbered, and if approved, should replace matching pages and plates in the approved M.R.P.

I have obtained bids for this project, and I am prepared to implement the plan upon your approval.
