June 16, 1986

TO: Wayne Hedberg, Permit Supervisor
FROM: Tom Munson, Reclamation Hydrologist ✓
RE: Gordon Creek No. 2 Mine Road Drainage, N86-4-2-1, Gordon
Creek #2 and #7 Mine, Haul Road Drainage Control Plans,
Beaver Creek Coal Company, ACT/007/016, Carbon County

On June 10, 1986 at 8:30 am, Division Hydrologist Tom Munson talked with Dan Guy concerning the implementation of the plans spelled out in the Division's May 27, 1986 letter. He stated that the concrete catch basin was scheduled to be installed this weekend with a rock gabion outlet. He asked for a variance to submitting the plans on this structure until June 19, 1986. I granted this variance based on the fact that the concrete basin was a similar design to the one currently in the plans at the Division for the opposite side of the road. This allows him to get the structure constructed at the same time as the other structures and still submit accurate plans.
