RE: MRP Amendment, Request to Amend Water Monitoring Plan, Gordon Creek #2 and #7 Mines, ACT/007/016, Folder #2, Carbon County, Utah

The operator's response to the Division memo dated February 3, 1987, is not acceptable. The majority of the response is adequate. The operator must commit to the monitoring program as stated in the DOGM remarks column of the February 3, 1987 letter. Specifically, stations 2-2-W, 2-5-W, and 2-6-W, must be sampled as DOGM requested in the February 3, 1986 memo (copy of letter and memo attached).
