INSPECTION REPORT COMMENTS

Permit No. ACT/007/016

Inspection Date 9 July 1991

Please number comments to correspond with topics on previous page.

3. TOPSOIL

The topsoil stockpile in the #2 area is well covered with vegetation and is in good condition. Topsoil stockpiles look good in general, unaffected by erosion.

4. HYDROLOGIC BALANCE

(b) Diversions--All ditches, culverts, inlets and outlets to ponds are clean and free from obstructions. All are in good repair.

(c) Sediment Ponds and Impoundments--Sediment ponds are in good repair. All contain water but have not discharged. Pond embankments are in good condition and free from erosion damage. Sediment level in Pond #7-A is nearing the 60% mark and will soon require cleaning.

12. BACKFILLING AND GRADING

The permittee is now carrying out demolition and site cleanup operations. No earthwork is being done or will be done this year. The permittee has been ordered by the Division not to do any earthwork until an acceptable plan for highwall reclamation has been adopted.

16. ROADS

(b) Drainage Controls--All roadside ditches and culverts are clean and in good repair.
