Chris,

I received your corrections to the 2003 water quality database inputs. Thanks for your prompt attention to this matter. I have outlined the corrections as I understand them below. Dana has already downloaded the additional data that you added to the pipeline, so these corrections have all been made. Let me know if you have anything to add or additional changes to make.

2-2-W 3-31-2003 Dana has added data you provided for parameters F-D.O., O&G, and D-Mg.

2-2-W 4-25-2003 The 2nd quarter data you uploaded to the pipeline has been downloaded.

2-7-W 3-28-2003 The 1st quarter data you uploaded to the pipeline has been downloaded.

2-8-W 4-25-2003 The 2nd quarter data you uploaded to the pipeline has been downloaded.

2-10-W 4-25-2003 Dana has removed the "no flow" input and has downloaded the replacement data you have uploaded to the pipeline.

It appears to me that with these changes the 2003 water quality data is complete for Gordon Creek 2, 7, & 8.

Thanks again.

Steve
