Pete and Amanda:

I have successfully uploaded to the Division's EDI site the Gordon Creek 2, 7 and 8 Mines 4th Quarter 2011 water monitoring data. The monitoring results are typical for each of the sites with the exception of 2-2-W. We are usually still able to obtain a sample and measure field parameters at this site. However, during the fourth quarter when the site visit took place, the sampling location was drifted over with snow and the channel surface frozen under several inches of ice. It is much more likely we will have a sample from this site during the 1st quarter of 2012.

Thanks,
Chris
