Dear Mr. Haddock:

I am requesting a 30-day extension of time to resubmit the As-Built information for the Gordon Creek Mines 2, 7, & 8 Mines channel repair work that was completed late last fall. The task ID number for this submittal is #5062. While we have had no difficulty in gathering and preparing our response to most of the identified deficiencies, to adequately measure the areas that were disturbed as part of the channel repair we feel it is prudent to wait until the disturbed areas are clear of snow cover. The snow should be gone from the repaired areas within the next 30 days.

Granting the mine a 30-day extension to the response time will allow for the submittal of a complete package that addresses the identified deficiencies. I appreciate your consideration in this matter.

Thanks,  
Chris D. Hansen
