**Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:**

The site has been reclaimed in excess of 10 years. The permittee will most likely apply for Phase III bond release this year. They may receive full or partial release depending on decisions the Division will make over last year's disturbance by equipment to reconstruct three diversions. Diversions #1, #2, and the main diversion I were reconstructed last year.

**1. Permits, Change, Transfer, Renewal, Sale**

The permittee does not have an amendment under review with the Division at this time.

**2. Signs and Markers**

The identification sign is just past the main gate. The information meets the requirements of the R645 Coal rules. See Picture

**3. Topsoil**

All topsoil was used in reclamation.

**4.a Hydrologic Balance: Diversions**

I inspected several diversions and they were functioning as design. The site received several rainstorms in the past couple of weeks. The diversions have held up during these storms. Sediment has started to fill voids within the rip rap of last year's repair area of the diversions.

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

The third quarter pond inspection by the permittee was on August 11, 2016. No hazardous conditions were reported. The pond was dry.

**8. Noncoal Waste**

The site was clear of non-coal waste materials.

**13. Revegetation**

Thistle was sprayed in August. Many of the thistles were dead, but, another spraying is needed. See Pictures.
