Chris,

Your request for additional time to respond to the Gordon Creek Midterm review is reasonable considering the status of the mine. Per your request, an extension of 30 days is hereby granted. You should now respond to the midterm review by no later than May 1, 2017. Thank you for your diligence in completing the requirements of the Midterm. Daron

Daron:

While we are not quite to the deadline of March 31, 2017 to address the deficiencies in the Gordon Creek MRP identified during the midterm review, I am respectfully requesting additional time to complete our responses to the deficiencies. Unfortunately, many of the deficiencies require us to prepare new permit maps for which we do not have electronic files. The same is true about our permit text files. Since this is a reclaimed site that has gone through Phase I and II bond release, we do not plan to recreate the entire permit in a more current digital format. Rather, we are making changes to the permit to address the deficiencies identified in the midterm review by creating new electronic map and text files for only those sections impacted by the deficiencies. Much of the work is being accomplished by one or two professionals that are currently employed at operating mines that generate income for Bowie Resources Partners, LLC. This work is being done at times when they are available to create maps or new text pages. We would appreciate your patience in this matter by extending the midterm review deficiencies response deadline by 30 days.

Sincerely,

**Chris D. Hansen**
