*Re: Permit Change for Coal Handling Facilities - Soldier Creek Coal Company*

*Dear Mr. Haddock:*

*Attached are forms C1 and C2 and necessary maps and M&RP page changes which reflect modifications to the proposed surface coal handling facilities at the minesite. These changes are necessary in order to improve surface coal handling efficiencies and will also reduce overall emissions. These modifications include the addition of a stacking tube and a conveyor reclaim system which will load trucks automatically from the surge stockpile. Loading trucks with the conveyor reclaim system will help reduce overall emissions by minimizing the use of a front-end loader to load stockpiled coal.*

*An application has been made to the Utah State Division of Air Quality for a change in the approved air quality permit.*

*It should be noted that the modifications will not disturb any additional area and will not affect any of the existing drainage structures.*

*Projected additional reclamation costs for these facilities are as follows:*

1.	82 yd <sup>3</sup> of concrete (disposed of on site)	\$ 680
2.	70 Tons of steel from conveyors and chutes	2,140
	<b>Total</b>	<b>\$2,820</b>

*Please also be advised that current bonding is sufficient to cover these additional reclamation costs.*

*Page 2*

*We would appreciate an early review and approval of the permit change as we are anxious to make these modifications as soon as possible in order to improve current efficiencies and meet projected shipping requirements.*

*If you need any additional information please contact Dave Spillman of my office.*

*Sincerely,*

# APPLICATION FOR PERMIT CHANGE

Title of Change:

Coal Handling Facilities

Permit Number: Act/ 007 /018

Mine: Soldier Creek Coal Company  
 Permittee: Soldier Creek Coal Company

Description, include reason for change and timing required to implement: Add coal stacking tube, reclaim feeders, conveyors and truck loading chute.
